WHY THIS RESOURCE:

1

Differentiated

Offers variations for different levels.

2

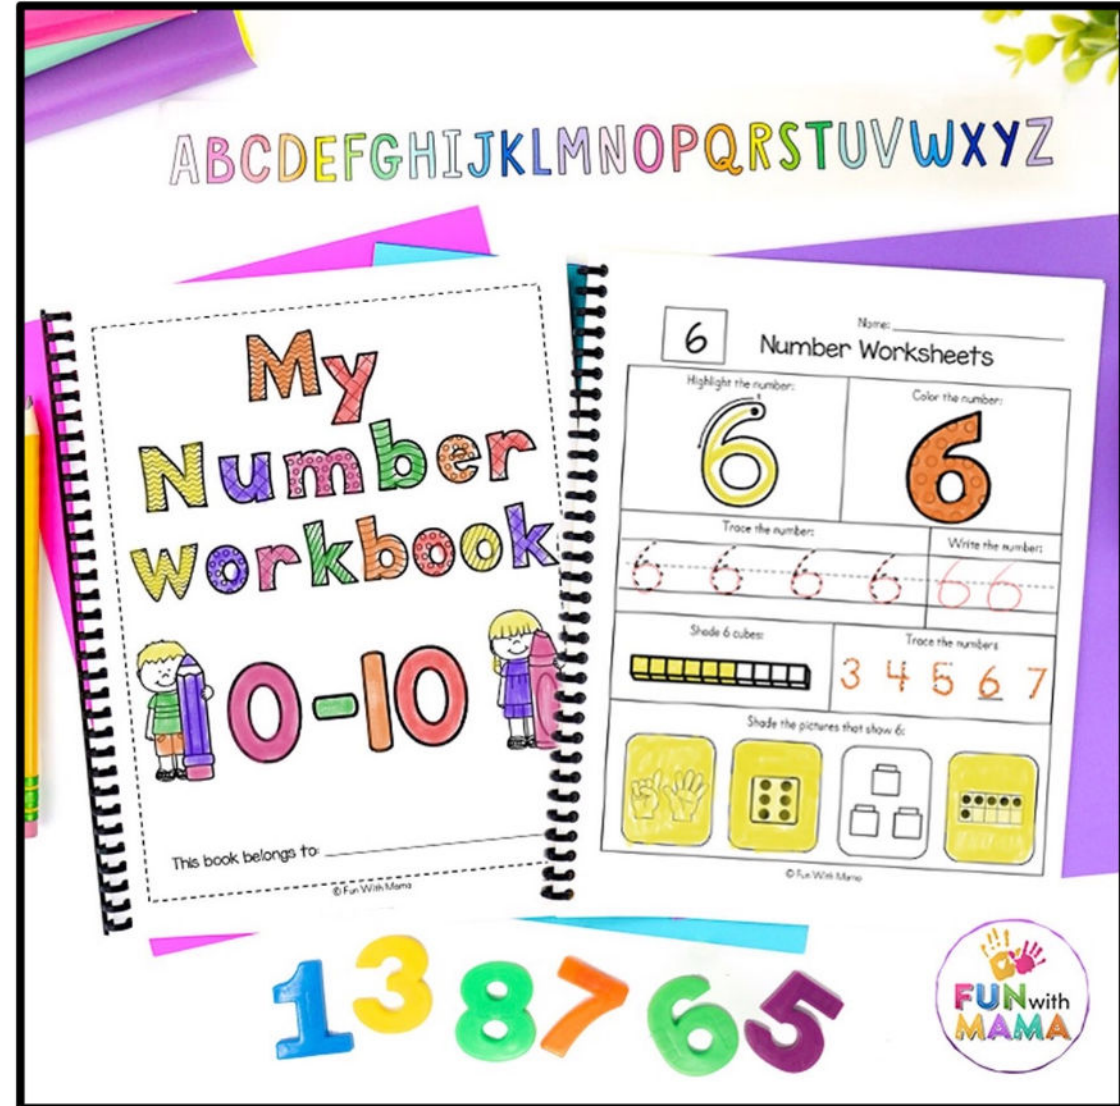

Good Practice
+ Great for Revision

3

Simple No Prep
Just print and go.

4
Independent Work

Once children understand the format,
they'll be able to work independently.

WHAT TEACHERS ARE SAYING:

I used these for small group math instruction and they worked out great!
- Molly Hutchison

We do this at the beginning of the year before we start our curriculum. We do it together. I plan to use it in centers. There are multiple pages with each number, which is awesome for independent work!
- Jill McQuellon

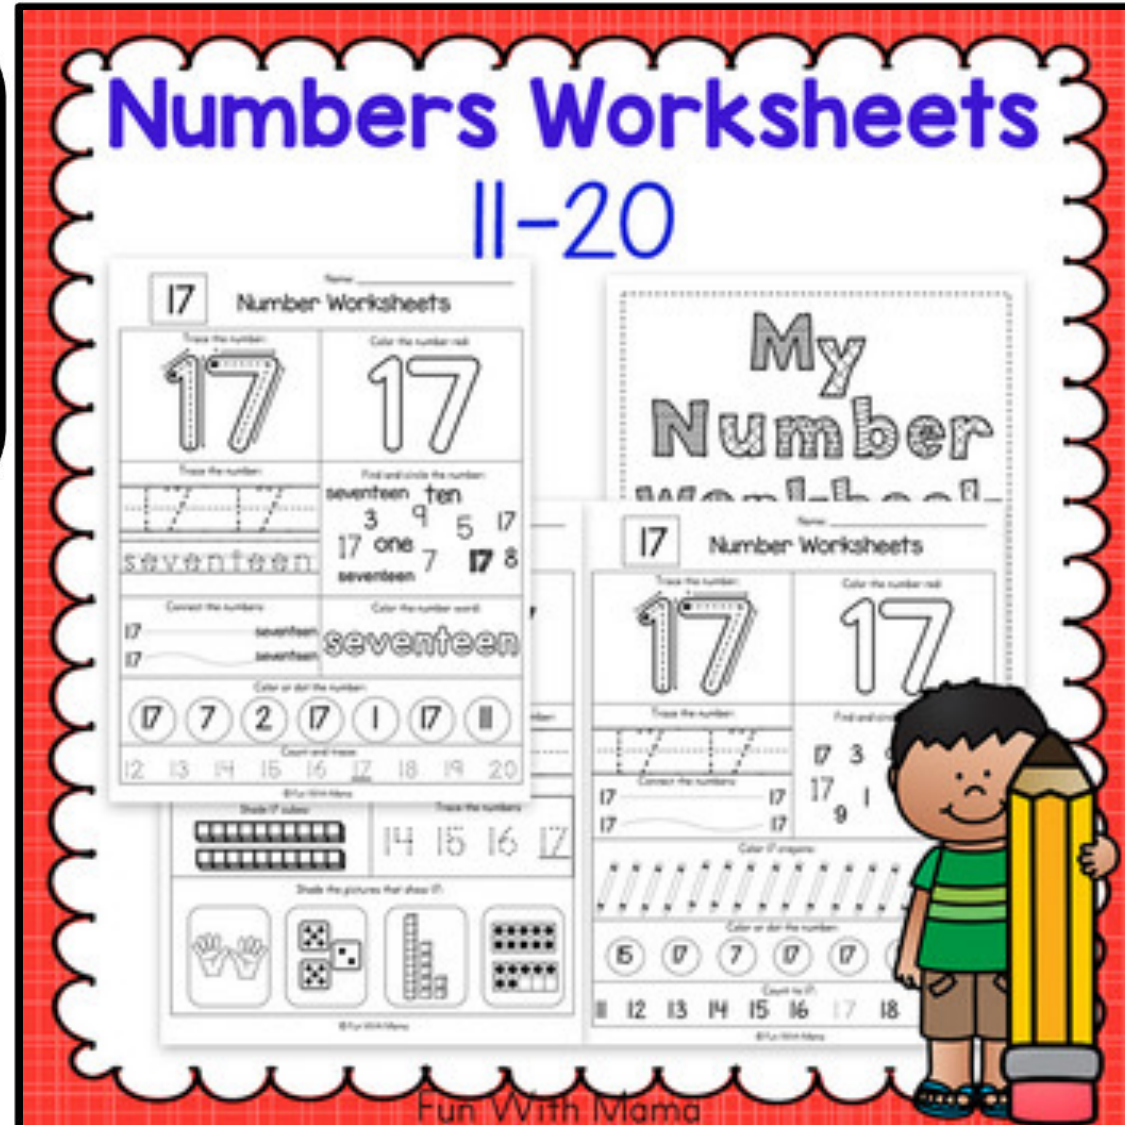

These are going home in our distance learning packets and the parents have reported the kids are eating them up! - Teacher Cat

Love these to reinforce skills for number sense!
- Julianne Z.

Grab Numbers 11-20 Here

What a great way to practice numbers. I loved this resource and found it to be very engaging for my students. They loved it and had fun with it as well! Such a great morning work resource as well. Thank you!
- Cassie Urban

I purchased this same packet but for 1-10 for my 3 y/o. Then I noticed my 5 y/o needed a refresh on 11-20 so I knew this would be perfect! I love that it has digits, words, and a number line. Great easy resource to print and use immediately.
Shelly A.

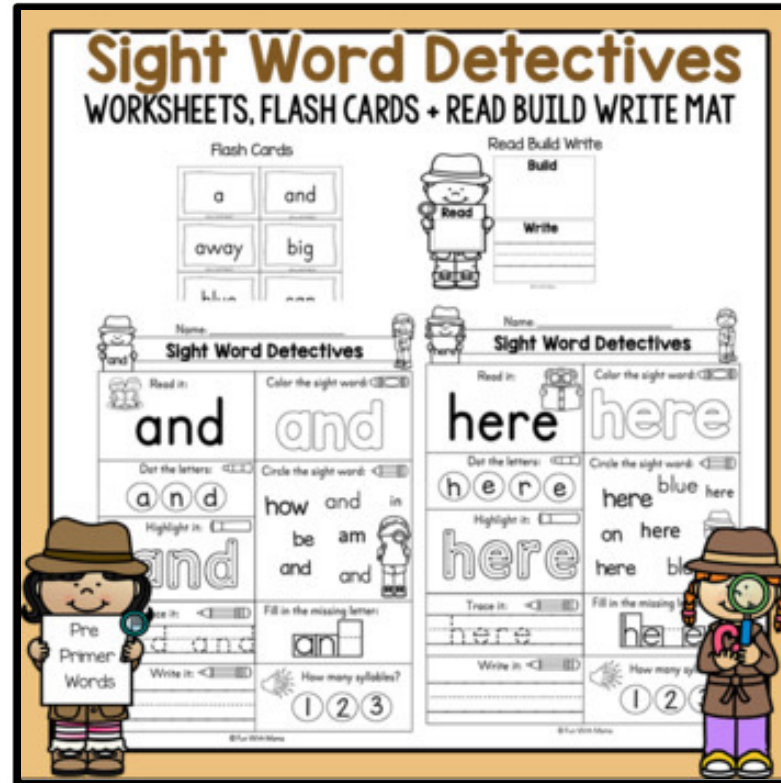

My daughter really loves this resource. Each number we do for 2 days, with 2 different printables from this resource. She looks forward to each sheet. Absolutely love it!
- Brainy Kids

My students really enjoyed this! Will continue to use it every year!
- Abigail Young

OTHER GREAT RESOURCES:

Perfect for revision.
