Puzzles

1 one

12	15	18	21	24	27	30	33

Addition - Shade the circle with the correct answer.

	+		=		
1		1			
	+		=		
3		1			
	+		=		
2		3			

Size Sequencing Cards

Print out on card stock. Cut out and laminate. Use to put in order.

3 Part Cards

When a frog begins as an egg. Each egg is surrounded by a clear layer of gel that absorbs water and provides protection. Eggs take 4 to 5 days to hatch.

A tadpole uses gills to breathe while swimming in the water. It eats water and animal matter. As the tadpole grows, it develops a pair of tiny eyes.

## Frog Life Cycle

A fully grown frog has not tail. It lives on land, but stays close to water. It breathes through its lungs.

frog

# A Look At Some Of The Worksheets

**I can draw a frog** Name: \_\_\_\_\_

**Frog Life Cycle** Name: \_\_\_\_\_

Directions: Color the pictures then cut and paste them in the boxes according to the correct life cycle sequence.
